

Co-funded by the European Union

Circular TwAI

# AI Platform for Integrated Sustainable and Circular Manufacturing

21 Partners

11 Countries

7,2M€ Budget

36 Months

Circular TwAI will increase the performance, resilience and sustainability of discrete manufacturing and process industries by developing a novel AI platform for circularity.

## 3 USE CASES

Li-Ion Battery Packs in E-mobility

Consumer Electric and Electronic Equipment Waste

Petrol-Chemical Production Plants

Sustainable manufacturing through AI technologies

End-to-end sustainability in industrial production

Industry agility and resiliency

Advanced circular manufacturing technologies throughout the product's lifecycle
